

Lucas Schoenherr

Senior Product Designer | UI/UX • Design Systems • AI Product Design

lucas.schoenherr@gmail.com • Rio de Janeiro, Brazil • linkedin.com/in/lucas-scho • designbylucas.com

SUMMARY

Senior Product Designer with 13+ years leading end-to-end design for major enterprise clients such as Vale, Vivo, Samarco, DirecTV, and Accenture. Specialized in UI, UX, Design Systems, and AI product design — with hands-on experience designing LLM conversational interfaces, Generative AI features, and AI-assisted flows shipped to production. Consistent track record solving complex operational challenges across telecommunications, healthcare, mining, and high-stakes environments, where interface clarity directly impacts safety and business outcomes. Sample outcome: Lighthouse — a mobile production-monitoring app for Vale — shipped 40+ screens in 8 weeks and was adopted by roughly 200 users.

PROFESSIONAL EXPERIENCE

Independent Product Designer • Self-Employed *Apr 2024 – Present*

- Hands-on specialization in AI and LLMs — Claude, Cursor, and Generative AI — applied to real product-design workflows: ideation, rapid prototyping, and accelerated design decisions.
- Designed and built my portfolio (designbylucas.com) from scratch: a hand-coded HTML/CSS/JS site with its own documented, queryable design system — including AI-agent compatibility.
- Complete case studies of enterprise projects: Gen.AI Vivo, Samarco Strategic PMO, Lighthouse (Vale), and Sports Experience (DirecTV/FIFA).
- Independent initiatives in financial management and business strategy, broadening my prioritization repertoire in complex contexts.
- Selected graphic-design and 3D-visualization projects for national and international clients.

Accenture — One Studio • Specialist Product Designer (UI/UX) *Jun 2022 – Mar 2024*

- End-to-end lead designer on in-house LLM conversational products at Vivo, integrating continuous user feedback through usability testing to refine AI-driven interfaces and reduce friction in production.
- Designed digital products for hospitals and healthcare institutions (Hospital Sírio-Libanês), translating complex clinical flows into intuitive interfaces — from research and journey mapping to technical handoff.
- Contributed to the FIFA World Cup broadcast project with FIFA and DirecTV, delivering cohesive cross-platform experiences (mobile, web, TV) under high-visibility, tight-deadline conditions.
- Led UX/UI design of critical dam- and mine-monitoring dashboards for Vale (Fortune Global 500), enabling real-time decisions in high-stakes environments where interface clarity directly impacts safety.
- Maintained and evolved a design system shared across multiple products, ensuring visual consistency and accelerating delivery through reusable, well-documented components.
- Delivered high-fidelity prototypes and PoC solutions that validated product hypotheses before development investment, supporting faster decisions across national and international teams.
- Mentored designers at all levels, raising the team's delivery quality through structured critique sessions and hands-on guidance.

Accenture & Vale Digital Lab • Senior Product Designer (UI/UX) — Design Team Lead *Jan 2020 – Jun 2022*

- Led and managed the Digital Lab design team, establishing process standards and delivery pipelines that improved alignment across squads and output consistency on simultaneous projects.
- Developed a multi-method research system that standardized how the team collected and synthesized user insights — enabling faster, evidence-based design decisions.
- Restructured the prototype and PoC delivery pipeline, reducing design-to-engineering handoff friction on tight-deadline deliveries.
- Designed interfaces for robotic-control systems in remote mining operations, where response precision directly impacts operational efficiency and worker safety.

- Led UX design of dam disaster-prevention dashboards in high-stakes monitoring scenarios, enabling real-time safety decisions.
- Ran usability testing and technical handoff across a diverse portfolio — on-site safety, quarantine prevention, financial processes, and route optimization.

Infobase IT · Senior Systems Analyst — UX/UI Design *Jun 2019 – Jan 2020*

- Research and prototyping for multiple Vale IT projects, translating complex internal processes into usable digital interfaces for service portals and mobile and desktop apps.
- Restructured the UX of Vale's service-transition system, reducing operational friction in a critical internal flow used across business areas.
- Designed Vale's corporate access portal, modernizing authentication flows and navigation architecture for thousands of internal users.
- Developed Vale's corporate governance design system — component library, pattern documentation, and governance model — enabling faster delivery with visual consistency at scale.

Other Experience *2009 – 2019*

- Freelancer — Architecture & Scenery Designer / Graphic Designer (national and international clients).
- Eletronuclear — Graphic Designer / IT.
- Interart Scenography — Graphic Designer and Set Designer.
- Fidelity — Graphic Design & IT Intern.

SKILLS

Design & Prototyping: Figma, FigJam, Framer, Adobe Photoshop, Adobe Illustrator

Productivity & Collaboration: Notion, Milanote, Obsidian, Jira, Agile/Scrum

AI & Dev Tools: Claude, Claude Code, Cursor, Google Antigravity, VS Code, Azure DevOps

Research & Testing: Maze, Mural, Miro, FlowMapp

Areas of expertise: User Experience (UX) & User Interface (UI) Design · Interaction Design & Design Thinking · Design Systems & Governance · User Research & Usability Testing · Prototyping & Rapid Iteration · Heuristic Analysis & Journey Mapping · AI Products (LLMs, Generative AI) · Visual QA, Documentation & Handoff · Accessibility (WCAG) & Front-End (HTML, CSS) · B2B Enterprise & B2C Products

EDUCATION

- Postgraduate — UX Design and Beyond (UX/UI) · PUCRS · 2022
- Cambridge Advanced English (C2) · Cambridge Certificate Training Center · 2014
- 3D for Interiors and Scenery / Digital Graphic Design · Universidade Veiga de Almeida · 2013
- Graphic Design, Illustration and Animation · Universidade Veiga de Almeida · 2012

LANGUAGES

- Portuguese — Native
- English — Fluent (C2)
- Spanish — Intermediate
