PORTFOLIO

designbylucas.com

Senior Product Designer with **13+ years** leading end-to-end design for Fortune 500 companies and major enterprise clients including Vale, Vivo, and Accenture. Specialized in **UI, UX, Design Systems, and AI-integrated product design** — with hands-on experience designing LLM-powered conversational interfaces, Generative AI features, and AI-assisted workflows shipped to production. Consistent track record of solving complex operational challenges across telecommunications, healthcare, mining, and high-risk environments where interface clarity directly impacts safety outcomes and business results.

EXPERIENCE

Independent Product Designer & Professional Development

Apr 2024 – Present

Freelance / Self-Directed

- Delivered freelance UX/UI design projects for national and international clients across multiple industries.
- Deepened expertise in **AI/LLM tooling** — including Claude, Cursor, and Generative AI — and their application to real product design workflows.
- Applied Generative AI to ideation, rapid prototyping, and design decision-making, accelerating iteration cycles.
- Developed personal initiatives in financial management and business strategy to strengthen product prioritization thinking.

Accenture — One Studio

2022 – Apr 2024

Product Design Specialist (UI/UX)

- Led **end-to-end UX/UI design for in-house LLM-powered conversational products** at Vivo (Brazil's largest telecom), integrating continuous user feedback through usability testing to refine AI-driven interfaces and reduce interaction friction in production.
- Designed digital health products for hospitals and healthcare institutions, translating complex clinical workflows into intuitive interfaces — from research and journey mapping through high-fidelity prototyping to dev handoff.
- Contributed to the **FIFA World Cup broadcast project** with DirecTV, delivering cohesive multi-platform experiences (mobile, web, TV) under high-visibility, time-critical conditions.
- Led UX/UI design for **dam and mine safety monitoring dashboards** at Vale (Fortune Global 500), enabling real-time critical decision-making in high-risk environments where interface clarity directly impacts safety outcomes.
- Maintained and evolved a **shared design system** across multiple products, ensuring visual consistency and accelerating delivery cycles through reusable, well-documented components.
- Delivered **high-fidelity prototypes and POC solutions** that validated product hypotheses before development investment, supporting faster decision-making across national and international teams.
- Mentored designers across all levels, raising team output quality through structured critique sessions and hands-on guidance — strengthening design standards across the guild.

Accenture & Vale Digital Lab

2020 – 2022

Senior Product Designer (UI/UX) — Design Team Lead

- Led and managed the **Digital Lab design team**, establishing process standards and delivery pipelines that improved cross-squad alignment and output consistency across multiple concurrent projects.
- Built a **multi-methodology UX research system** that standardized how the team gathered and synthesized user insights — enabling faster, evidence-based design decisions across the lab.
- Redesigned the prototype and POC delivery pipeline, reducing handoff friction between design and engineering and improving velocity on time-critical deliveries.
- Designed interfaces for **robotic control systems** used in remote mining operations, where interface clarity and response precision directly impact operational efficiency and worker safety.
- Led UX design for **dam disaster prevention dashboards** used in high-stakes monitoring scenarios, enabling real-time safety decisions where interface failures could have critical consequences.
- Conducted applied usability testing and led design-to-engineering handoff across a diverse portfolio — on-site safety, quarantine prevention, financial processes, and route optimization — ensuring each solution was validated before deployment.

Senior Systems Analyst — UX/UI Design

- Led research and prototyping across multiple IT projects for Vale, translating complex internal processes into usable digital interfaces across service portals, mobile apps, and desktop applications.
- Redesigned the UX for **Vale's service transition management system**, reducing operator friction and improving efficiency in a critical internal workflow used across business units.
- Designed Vale's **enterprise access portal**, modernizing authentication flows and navigation architecture to streamline access for thousands of internal users.
- Built **Vale's enterprise Design System from scratch** — component library, visual standards, and governance model — enabling multiple product teams to ship faster while maintaining visual consistency at scale.

Earlier Experience

2011 – 2019

- **Freelance** — Architecture & Scenario Designer / Graphic Designer (national and international clients)
- **PTT Eletronuclear** — IT Technician in Controlled Areas
- **Interart Brasil** — 3D Modeler & Set Designer
- **Fidelity Brasil** — Graphic Design & IT Intern

SKILLS

TECHNOLOGY

Design & Prototyping

Figma, FigJam, Framer, Adobe Photoshop, Adobe Illustrator

Research & Testing

Maze, Mural, Miro, Flowmapp

AI & Dev Tools

Claude, Claude Design, Cursor, Google Antigravity, VS Code, Azure DevOps

Productivity & Collaboration

Notion, Milanote, Obsidian, Jira, Agile / Scrum

AREAS OF EXPERTISE

- User Experience (UX) Design
- User Interface (UI) Design
- Interaction Design
- Design Thinking
- Design Systems & Governance
- User Research & Usability Testing
- Prototyping & Rapid Iteration
- Heuristic Analysis & Journey Mapping
- AI-Integrated Product Design (LLMs, Generative AI)
- Visual QA & Documentation & Delivery
- Accessibility (WCAG)
- Front-End Development (HTML, CSS)
- B2B Enterprise & B2C Products

EDUCATION

Post-Graduate — User Experience Design and Beyond (UX/UI)

PUC RS

2022

Cambridge Advanced English (C2)

Cambridge Certificate Training Center

2014

3D Design for Interiors & Graphic Design for Digital Marketing

Universidade Veiga de Almeida

2013

Graphic Design, Illustration & Animation

Universidade Veiga de Almeida

2012
